Examiner's Detailed Office Action

1. Claims 1-23 are allowed.

REASONS FOR ALLOWANCE

2. The following is an Examiner's statement for reasons for allowance:
3. The closest art *Kotsavasiloglou et al.*, "Model for a Neural Network Structure and Signal Transmission," Physical Review, October 1997, does not teach or render obvious applicant's claimed invention. In particular, *Kotsavasiloglou et al.*, discloses a neural network constructed of a large number of neurons. Moreover, in *Kotsavasiloglou et al.*, a number of neurons are first formed independently and then placed together on a two-dimensional square lattice in random positions. Because the neurons in *Kotsavasiloglou et al.*, are formed independently and then placed together, *Kotsavasiloglou et al.*, does not disclose or suggest coupling the first fractal structure to the second fractal structure during the step of growing the second fractal structure, as pointed out in claim 1. *Kotsavasiloglou et al.*, lacks certain features and the combination as specified in claim 1.
